

New Hettich products for the trades

Preview of Holz-Handwerk 2012

The Hettich exhibition stand will be showing how hinges, drawer and runner systems as well as sliding door systems work in practice on furniture in various home environments. It will also be presenting the sixth edition of the classic “Furniture Fittings and Applications” catalogue. And Holz-Handwerk will see the marketing launch for Hettich’s award-winning *ArciTech* drawer system as well.

Holz-Handwerk 2012, the Trade Fair for Machine Technology, Equipment and Supplies for the Wood Crafts, marks the beginning of marketing for the new *ArciTech* drawer system for the trades. *ArciTech* has won both the IF Product Design Award 2012 and the OWL Innovation Prize 2011. Alongside incredibly smooth running action, high stability and the broad product line-up based on a single platform, the presentation at Holz-Handwerk will also focus on ease of installation and adjustment. The 3-D cinema, that was a highlight at the 2011 Interzum fair, will also be a visitor magnet on Hettich’s stand at Holz-Handwerk.

In the hinge segment, *Sensys* is synonymous with practical function, emotional appeal and outstanding design. The hinge impresses with its even, gentle closing action from an unusually wide angle of 35 degrees.

With the three options of *TopLine M*, *L* and *XL*, Hettich offers sliding door solutions that satisfy the most exacting of demands on quality, convenience and functionality.

With the flexible *SystemaTop 2000* drawer system, Hettich sets standards for high-quality pedestal organisation. *Systema Top 2000* turns desk pedestals into small but effective organisational helpers. Whether partial, full or over-extending runner with self-closing function, soft-closure or push to open – the modular system opens up boundless possibilities.

For the first time, Hettich will be presenting the *Blue Max* automatic drilling and insertion machines as well as assembly aids and drilling jigs in the machine hall.
