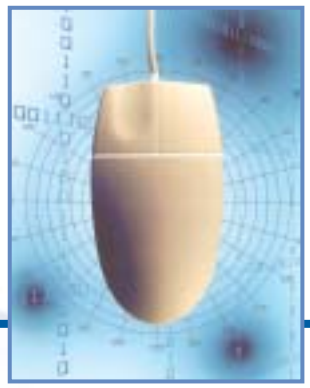
hettlock
locking plan software



For programming hettlock and SimonsVoss locking plans on a personal computer or laptop.

Covers
- up to 8 000 transponders
- up to 16 000 locks in the building and furniture
- in the form of an easy-to-understand two-dimensional matrix
- in a clearly arranged locking plan with organisational aids and sorting functions.

Permits a large variety of settings for controllers and transponders.
- Locking strategy – automatically or at the push of a button on the transponder
- Time-related access rights
- Response when power reserve is exhausted
- Limited validity period of transponders

Locking plans can be expanded at any time – also retroactively – and adapted to meet new requirements until the capacity limits are reached.

4 languages on one CD-ROM:
- German
- English
- French
- Italian
