Specification
hettlock transponder

Active radio transponder for complete operation of the digital hettlock furniture locking system from Hettich and the digital locking and organisation system 3060 from SimonsVoss for buildings.

With optional limitation of the validity period.

Black with red or blue button.

Diameter = 42 mm, height = 13 mm

The transponder is delivered without programming.
 Must be individually programmed by the customer.

hettlock transponder

The **transponder** drives the controllers of the hettlock furniture locking system and of the locking and organisation system 3060 made by SimonsVoss Technologie AG at the push of a button.

Like the controllers, the transponders are not programmed on delivery. Through the programming, each transponder is assigned to the user and the unambiguous uncrackable access authorisations in up to three locking plans.

Programming, see [page 37](#).

Article	Finish	Order No.	PU
Transponder	black/blue	041 234	1
	black/red	041 235	1

Radio permits in accordance with CE 0682 have been issued for hettlock for all EU countries (as in October 2001), in Switzerland, Iceland, Norway, Lithuania and Singapore. Status: February 2003.
