

Cosario

Compact, accessible storage

The new "Cosario" fitting system impresses at first glance. Unlike a conventional wall unit, storage space is completely open to view and provides ergonomic access to contents.

Mounted below a wall unit, Cosario is the ideal place to store herbs and spices or kitchen gadgets out of sight, but handy when needed.

The integrated light strip is an attentiongrabbing feature. With the Cosario shut, the light illuminates the countertop; when it's open, the contents are illuminated.

Cosario combines unobtrusive good looks with innovative technology, it's a winning way of making better use of wall storage space.
