

InnoTech

drawer system – Simply different

The „InnoTech“ drawer system takes individualised design behind cabinet doors and will provide an even wider range of visual options for creating that mark of distinction.

For example, a charcoal-coloured drawer profile extends creative latitude beyond the front. Meanwhile, the new colour shade elevates kitchen aesthetics to new heights. Combined with the stainless-steel railing, it makes a striking statement that brings expressive design to kitchen drawer interiors as well.

Two new decor profiles, in chrome effect for the silver steel drawer frame and in stainless-steel effect for the new charcoal-coloured drawer frame, demonstrate expressive styles that kitchen furniture manufacturers can use to give their products a distinctive flavour. Looking at the open drawers from above, the innovative design is stunning and gives kitchens a statement of exclusivity. The self-adhesive profiles can be attached simply to the drawer frame at the end of production or be purchased ready mounted.
