

The Quadro – unrivalled in the office too
New Systema Top 2000 products for even more convenience
and design flexibility

Kirchlengern, February 2010. **With its flexible storage solutions and time-honoured Quadro drawer runners, the "Systema Top 2000" organisational system is setting new standards in high-quality office organisation. System specialist Hettich now presents new options for desk pedestals.**

The firmly established Quadro drawer runner effortlessly stands up to the particular wear and tear of the office: steel balls in high-precision runner profiles ensure easy-action, quiet and secure running performance even when drawers are heavily laden. The self-cleaning principle of the steel balls permanently guarantees velvety smooth running action. Enhanced soft closure provides even more peace and convenience every time a drawer is shut. "Systema Top 2000" leaves you wanting for nothing either in terms of furniture design because from now on the push-to-open function is also available for pedestals. A light press on the drawer is all it takes for the precision actuating mechanism to open it automatically and in virtual silence.

Numerous new products from the Systema Top 2000 line-up now bring organisational convenience to the inside of desk pedestals. The "OrgaTank" securely and stably holds tall items. The simple flip-open system is installed in next to no time. In shallow drawers, the flexible "OrgaWelle" provides an easy and effective way of keeping smaller-type objects neatly in their place. By way of option, both organisational systems can be combined with an anti-slip mat to reduce noise and enhance the drawer's looks. 40 mm high and

holding 54 per cent more, the new pencil tray makes optimum use of a pedestal's practical storage space. It is compatible with the standard pencil tray and is optionally available with soft-closing function.

Now also available for office furniture, "DesignSide" adds a visual statement, taking account of the demand for more individuality and design highlights inside desk pedestals too. In terms of function, the "DesignSide" replaces the traditional file cradle without the user having to forfeit this popular form of filing.
