KITCHEN DESIGN POST COVID-19 IDEAFORECASTBOOK

“ COVID-19 will reshape our world. We don't yet know when the crisis will end. But we can be sure that by the time it does, our world will look very different.

-Joseh Borrel

About Us

The company's origins date back to 1888, when Karl Hettich began making the new clock component he had invented. By 1930, his descendants had diversified into furniture fittings, setting up production in East Westphalia – a center of the German furniture industry.

Today, Hettich, still family owned, has become an industry leader with a worldwide reputation. We're one of the world's largest manufacturers of high-quality furniture fittings, with over 6,000 employees in more than 100 countries. The company's success has been built on four enduring values: quality, innovation, close cooperation with customers and absolute reliability. We work to inspire our customers with our ideas and our passion.

PREFACE

The times have changed and so does the way we use to live our life needs to be changed after this pandemic. The COVID-19 Pandemic has surprised the entire human race that how a small invisible enemy can bring us at our toes.

We at Hettich India, is always stood up to our values and innovation. We have been a leader in the market for our innovative products which enhances the living.

Our, Design & Innovation team took this challenge to come with a kitchen design for future and life after pandemic. So, that you make your life safe and secure. We have designed kitchens which focuses on the well being of our customers. We have made industry leading solutions which mainly focuses on hygiene & safety from coronavirus and from other such viruses. In this IdeaBook you will find the Kitchen Design forecast which keeps your family safe & secure and also makes your work & life better.

We still believe that we will overcome this difficult time and life will turn to normal but now the normal will include safety, hygiene and self care.

“ The secret of change is to focus all of your energy, not on fighting the old, but on building the new.

-Socrates

EVOLUTION OF DOMESTIC KITCHEN

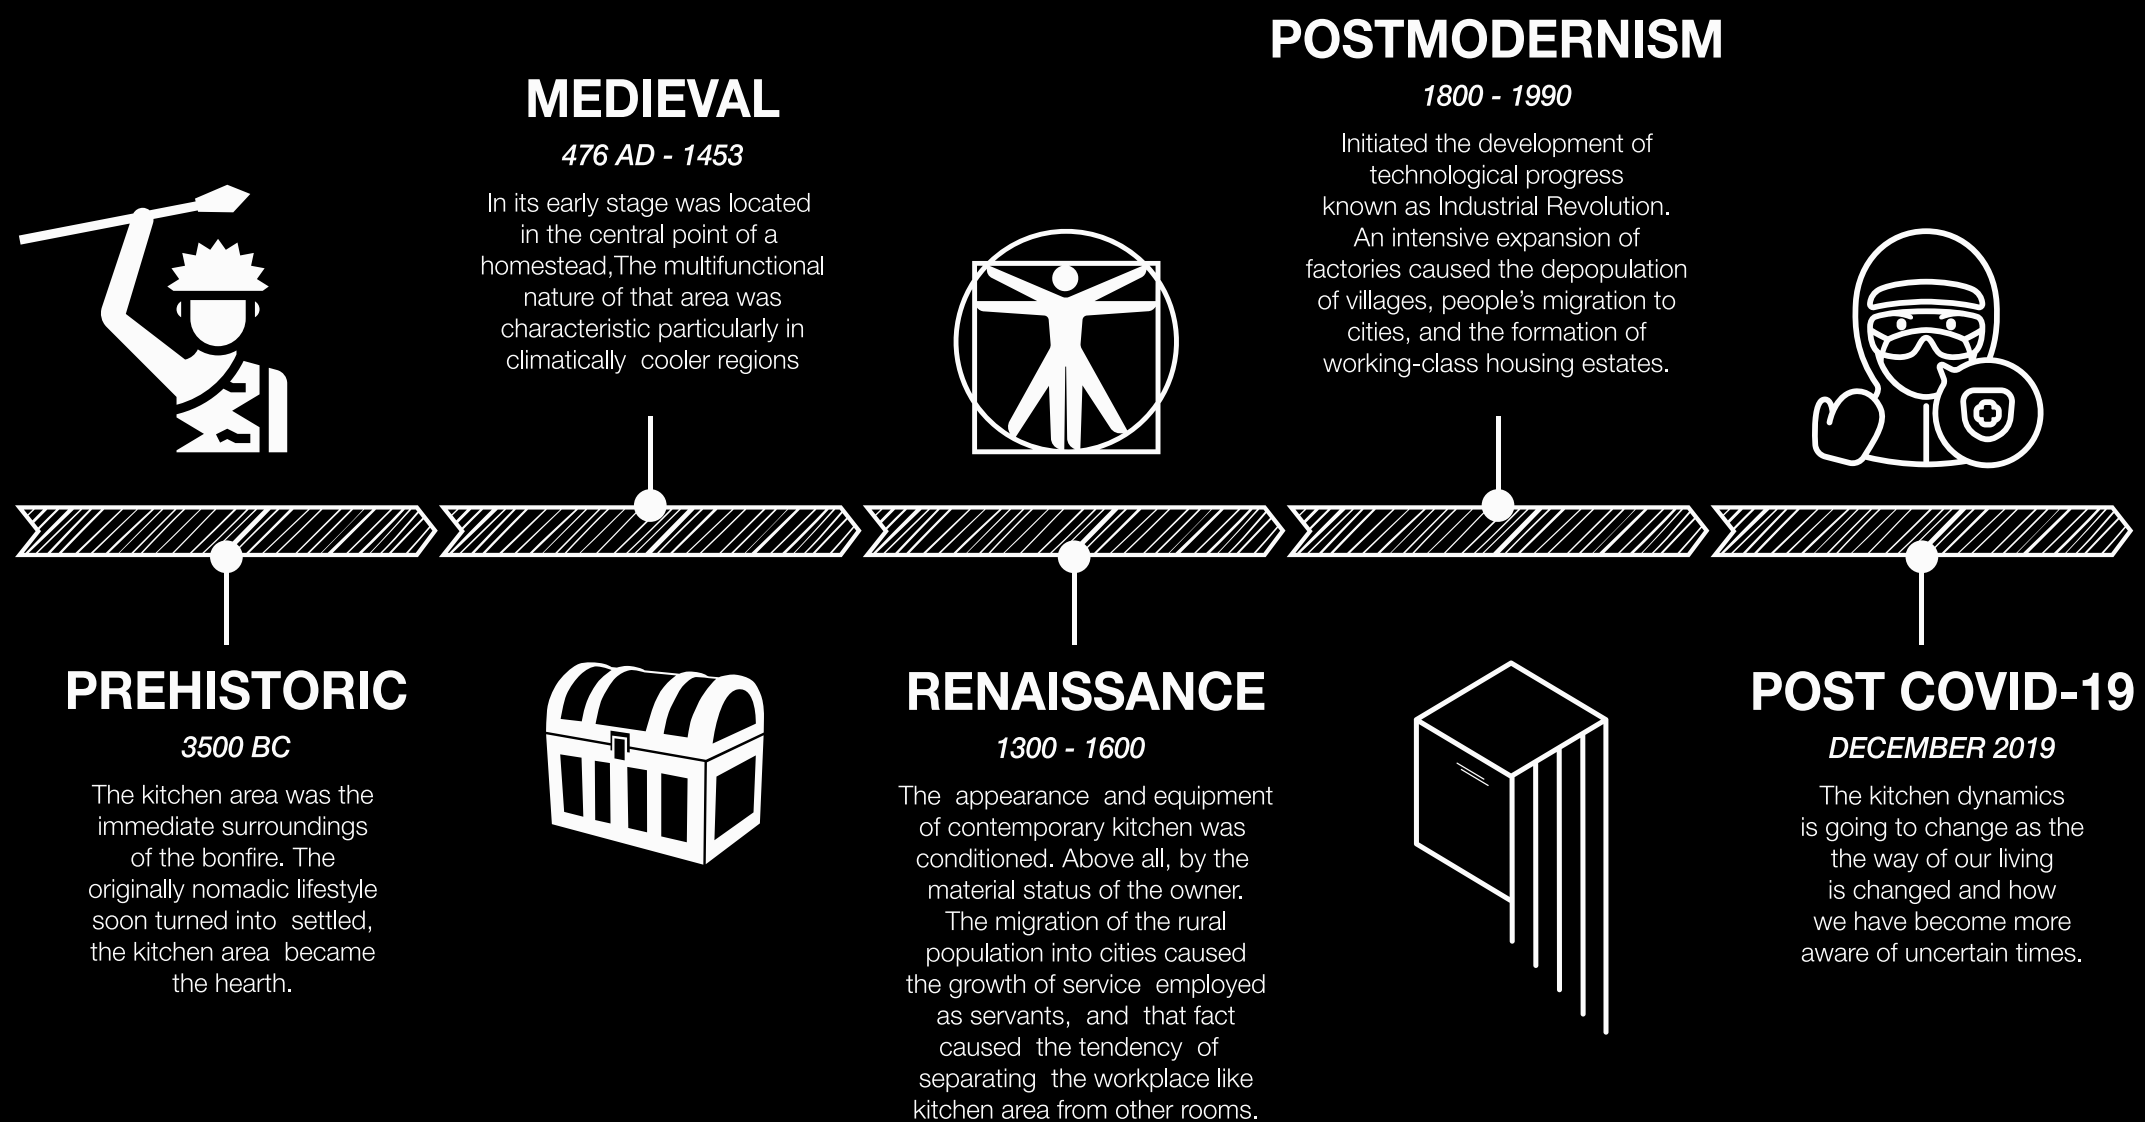

Domestic kitchen area is the most important, most intensely used functional area in the House. From the beginning of its existence kitchen has influenced family integration and socialization processes.

For centuries the kitchen area has been changing its equipment, shape and location with regard to other rooms in a home. The appearance, ergonomics and anthropometry made it possible to do a research, in order to simplify kitchen work.

Kitchen functional areas, an integration of equipment functions and their grouping, which is seen models of the open kitchen and the island-shaped kitchen. The evolution of domestic kitchen is a constant process, and because of that fact Covid-19 effected whole world so it does to kitchen as well. It needs to be not only ergonomics but many more factors involved in designing kitchen post Covid-19.

It is necessary for designers to strategics and both planning and correcting the existing kitchen solutions. This book has kitchen models to follow new lifestyle and precautionary measures whilst designing kitchen.

TIMELINE OF EVOLUTION OF KITCHEN

HAPPY KITCHEN

Kitchen Design Forecast 1

**This time, make
happiness your
lifestyle.**

This Kitchen focuses on a happy lifestyle, by emphasizing distant zones for cooking, washing and working. Having ample ventilation and openness makes your space look more grand and breathable, inviting a positive aura all around. The kitchen is well equipped with high end furniture fittings.

Kitchen Design Forecast 6

Always Eat Your Greens.

A kitchen island is an interesting concept that adds workspace and can also be used as a dining area or working area. The island is basically used as additional space for food preparation and cooking support, but is finding increasing use as a table for quick meals, especially with small and working families. It is surrounded by lovely greens which add a liveliness to the whole space.

AMALGAMATION

Kitchen Design Forecast 9

Work While You Cook And Cook While You Work

Amalgamation allows you to work from the kitchen. The design also keeps the kitchen ventilated. Use of antimicrobial surfaces and dry copper will help in keeping the virus at bay. Handle less design with sensor reduces the contact points and helps maintain hygiene. Working is made easy with the extending desk and keeping resources in reach.

COOKING BEFORE - AFTER.

Below is the comparison we derived after carefully researching & analysing the Kitchen Design and need of the hour. These are key differences and things we will be doing in future kitchen design post COVID-19.

BEFORE COVID-19

AFTER COVID-19

- Till now people having standard material & some special material to develop there furniture.
 - People want setting as per their comfort and requirement.
 - Till now people having standard use of appliances.
 - Till now people having touch based operation & few times push based for furniture fittings.
 - Family members, maids having same entry points in the kitchen.
 - People having work areas away from kitchen.
- Now, people will demand for Antibacterial coated based material for there furniture for maintaining the hygiene.
 - Now, people will focus on work triangle so that they have dedicated work zone to maintain hygiene and distance.
 - Now, people will demand for inbuilt sanitization in the ref. or separate appliances for sanitization with heat or spray also might have function for self sanitization every 24 hours.
 - Now, people will try to have sensor based operation in their shutters and drawers, with less of P2O application.
 - Having different entry point for maid, with proper screening sanitization.
 - Now, people will try having worktop extension in the kitchen itself because of WFH trend.
