IDEA BOOK SLIDING SYSTEMS

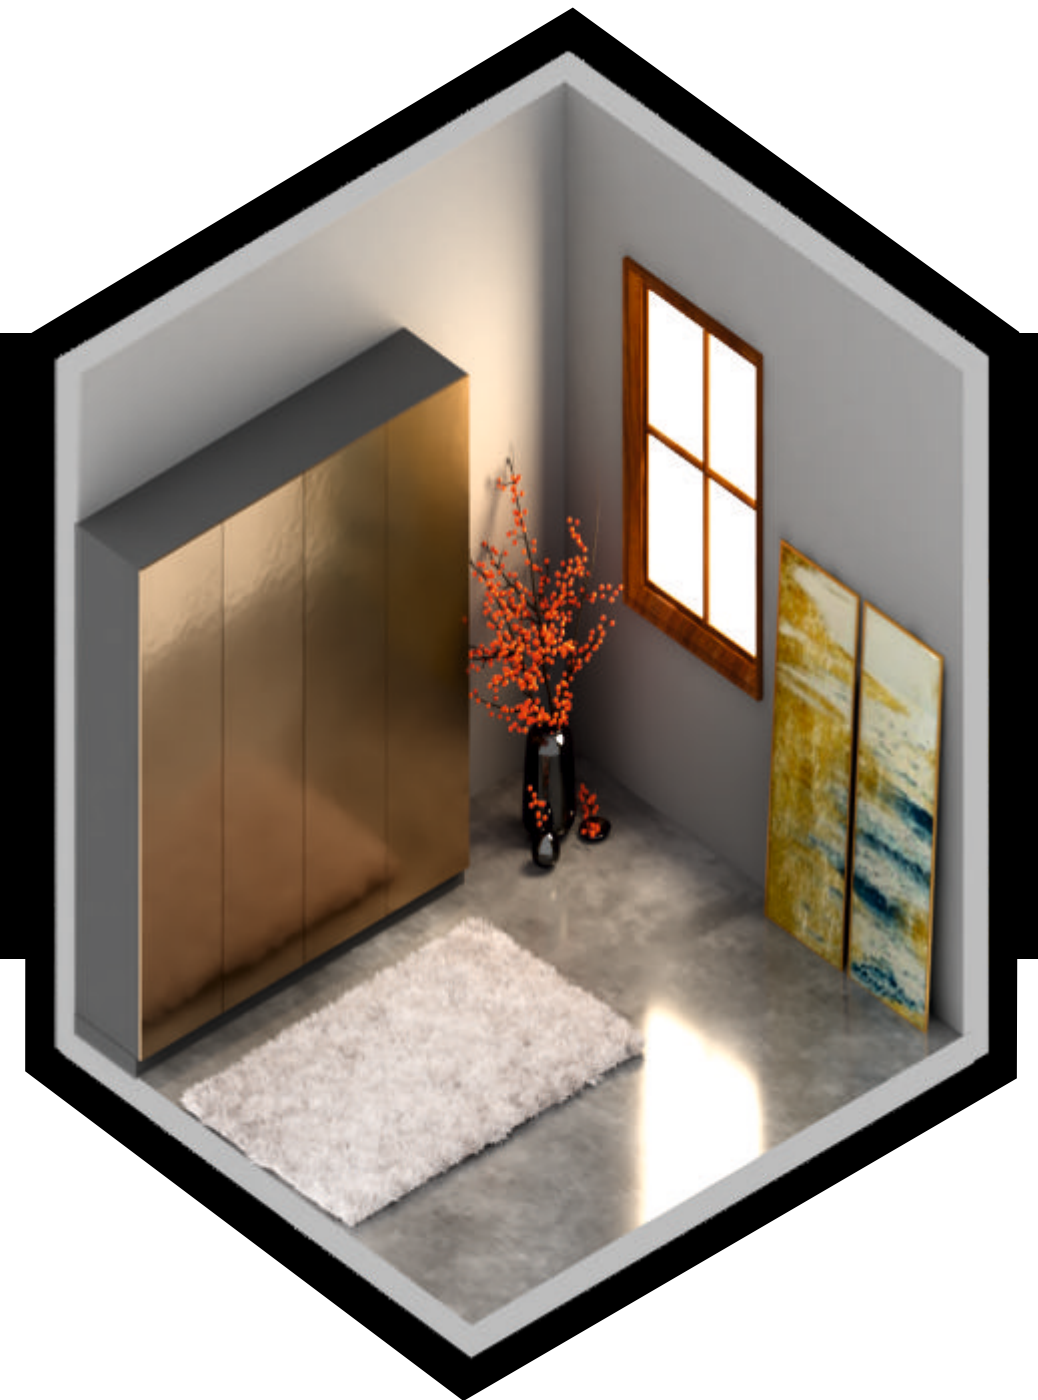

LUXURY IS REALLY A STATE OF MIND

Till very recently, the concept of luxury housing was limited to location and size. Those who could afford such homes were high net worth individuals who wanted to live in large bungalows in premium locations. The size and location were directly related to the wealth the individual had.

With urban India changing fast - a younger population with rising disposable incomes and exposure to global trends, the concept of a luxury home now encompasses various amenities and conveniences; the aim of this book is to provide a luxurious interior environment.

Taking all of the above into consideration, in today's world luxury is really a state of mind. It's what makes you happy enough to enjoy what you have rather than always seeking more. High end Hettich furniture fittings and accessories give you that and so much more. It's not a show of wealth but the enjoyment of what wealth has to offer. This is Luxury Redefined!

Luxury in Lifestyle

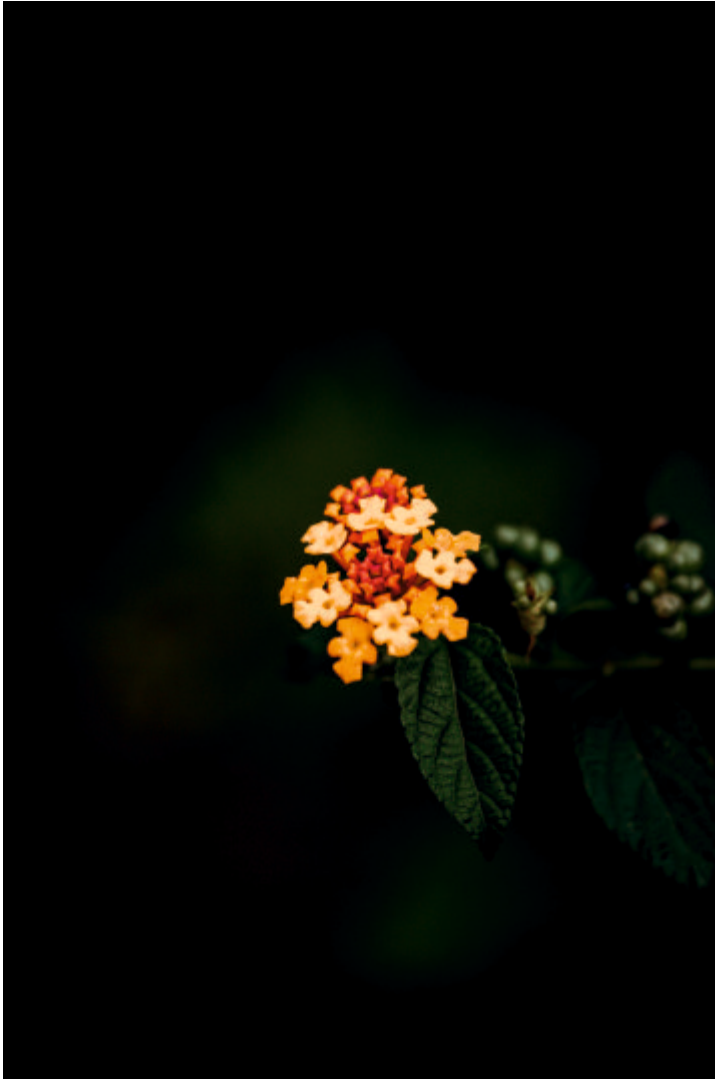

In today's world, luxury in lifestyle is having the time and money. It's like having something in your mind and the next moment, you are able to fructify the same. Luxury is a state of the mind.

Luxury in Furniture and Spaces

From styling distinct spaces, conceptualizing interior design ideas to designing luxury furniture & spaces, Hettich understands a repertoire of customized interior design solutions for residential and commercial spaces alike, we constantly endeavour to create unique pieces of art.
