

Hettich DIY at the International Hardware Fair 2026 – Innovations for creative do-it-yourselfers

Product premieres at the International Hardware Fair 2026

Building your own furniture and furnishings is a growth market. Creativity, self-fulfilment and cost savings are making DIY an attractive option for more and more people, and they're constantly looking for inspiration and new products. Whether in DIY stores, online shops or social media channels, what's needed are functional, easy-to-use fitting solutions that deliver results to be proud of. Hettich Do-It-Yourself will be showcasing a host of these at the [International Hardware Fair from 03 - 06 March 2026](#) in Cologne.

Hettich DIY is an innovative player in the DIY trend market. Fitting solutions developed within the international Hettich Group for industry and trade are a constant source of products for the DIY segment. With EasySpin, Hettich is presenting a top innovation for do-it-yourselfers, alongside many other exciting new products.

EasySpin brings rotation to furniture

EasySpin opens up a new dimension of furniture function: with EasySpin, furniture can rotate to reveal two independently customisable sides in a single product. The innovative mechanism delivers surprising design freedom, makes optimal use of space and helps even small floor plans feel bigger. Each side can look different, be used differently or staged differently, functional front and decorative back, or open and closed. EasySpin is a square, wheeled platform onto which the furniture is mounted. It combines

comfort, creativity and flexibility, making it a must-have for design-oriented DIY enthusiasts.

TL corner bracket - industrial chic for workshop and living

Building your own workbench? No problem with the new TL corner brackets from Hettich DIY. The L-shaped T-construction made of 2.5 mm high-quality steel with eight-point fixing gives solid, heavy furniture constructions the stability they need, no more wobbling or tilting. The striking black TL brackets fit perfectly with the industrial style. Whether shelves, tables and benches, machine bases or pergolas, TL brackets offer a wide range of applications.

DIY drawer pull-outs - an end to cabinet clutter

With adjustable telescopic pull-outs, organising cabinet contents has never been easier. The drawers can be continuously adjusted in width from 32 to 68 cm; depths of 42 or 52 cm and a height of 7 cm make full use of every centimetre. Poorly organised cabinets become clearly structured, easily accessible storage. Tool-free assembly is simplicity itself. Thanks to innovative nano-adhesive technology, durable, damage-free fixing on metal, wood or plastic surfaces is no problem. Robust ball-bearing runners glide quietly and smoothly, even under heavy loads — a real boost in convenience for furniture in the kitchen, utility room, bathroom or office.

Click & Hang – the magnetic organisation system

Fix with magnets instead of drilling or gluing. The ingenious Click & Hang range from Hettich DIY includes 19 different organisational helpers specially developed for storing utensils on the washing machine or refrigerator. Everything has its place and

is always within easy reach. Click & Hang works on all metallic surfaces and can be attached and removed with ease.

Self-adhesive metal strips are also available as accessories, allowing Click & Hang to be used on virtually any other surface.

Hettich DIY - trendsetter in the DIY segment

Current home-living trends are reflected not only in the colourways of Hettich DIY's decorative fittings. Furniture feet come in on-trend colours, from natural tones and pastels to statement shades such as cornflower blue. Door hooks and metal coat racks stand out in sage and coral. There's a wide choice of modern designs and new materials for handles and furniture knobs, including faux leather, stone and jute. Another highlight is a range of exclusive occasional tables made of high-quality magnesium oxide in various designs — eye-catchers indoors or outdoors.

Hettich DIY will present its new products in the shelving on the Trade Fair Boulevard. There's space and time for conversations at [Exhibition stand K010, K011 in Hall 11.1.](#)
