Folding door systems:  
WingLine L
Experiencing folding doors in a new way. WingLine L lets you produce folding sliding doors in a completely new dimension of convenience. The revolutionary Push / Pull to move opening mechanism provides access to everything inside the cabinet with just one movement of the hand. An impressive panorama effect! Further highlights: optimised running performance, soft opening and closing, tool-less installation as well as minimal door protrusion for efficiently organising the space inside. WingLine L competently and securely moves door wings weighing up to 25 kg and measuring up to 2,400 mm in height: a talented all rounder for the bedroom, kitchen and office.

Panorama convenience: access to 6m² of cabinet content, leaving everything in perfect view.
For easy and gentle opening: Push / Pull to move module first class practical convenience.
Optimum use of space: minimal door protrusion, with door reliably held in place while open.
Purist and convenient: no distracting profile on the bottom panel.

Handleless perfection: The door set opens all the way with just one push - from the Push to move module.
Impresses everywhere: WingLine L is suitable for all commonly used door wing formats.
Impressive running performance: as smooth as never before and virtually silent.
Easy and cost effective: intelligent installation accessories for efficient one person installation.

## Technical details in brief

- For one folding door with 2 wings
- Overlay door position
- For wooden doors
- Push / Pull to move
- Suitable for use with Sensys hinge
- Door wing weight up to 25 kg
- Door height up to 2400 mm
- Door wing width up to 600 mm
- Tested with 40000 cycles

## Door format and door weight

  - 2 part
  - Tool-less fast installation

- Push to move / Pull to move
  - Mechanical, soft opening of the door panel set
  - 3 force options depending on door panel width and weight

- Push to move
  - Reliably keeps the door closed

- Intelligent installation accessories
  - Profile installation
  - Positioning centre hinges
  - Positioning Push/Pull to move

- Folding door system
  - WingLine L / attached to the side
  - System summary
Pull to move and Push to move are two innovative and unique opening mechanisms for folding door systems. A slight pull on the handle or gentle push on the (handleless) front automatically opens the door all the way, taking it to the open position in a cushioned movement. A fascinating opening effect that works all mechanically! This means it requires neither cables nor any connection to the power supply.

For Push to move and Pull to move to work perfectly in conjunction with every door size and weight, the modules are available in various capacity classes. Choose the right set for your particular application. A trial mounting is recommended!
Folding door system
- WingLine L / attached to the side
- System components

Running component for door wing weighing up to 25 kg with self closing feature
- Can be used in standard folding door application without opening mechanism
- Can be used in combination with Pull to move Silent
- Tool-less fast installation
- With 2 concealed hinges
- +/- 3 mm height adjustment
- Steel, nickel plated / plastic, grey

Centre hinge with adjustable offset pivot

- Centre hinge for folding doors
- For door thicknesses from 15 mm
- Same drilling pattern for door and side element, both elements are mounted separately
- The reveal can be infinitely adjusted from minimum reveal to + 4 mm, application is always flush
- Gradual adjustment of the pivot offset with 0 mm, 3 mm and 6 mm
- Zinc die-cast nickel plated

</tr>
</tbody>
</table>

#### Positioning aid centre hinge

- For easily defining the right drilling position for the fast assembly centre hinge
- 2 mm, 3 mm, 4 mm and 7 mm centre reveal possible
- Plastic, grey

<table>
<thead>
<tr>
<th>Order no.</th>
<th>PU</th>
</tr>
</thead>
<tbody>
<tr>
<td>9 237 039</td>
<td>100 ea.</td>
</tr>
</tbody>
</table>

#### Door protection clip

- Prevents a bowing door from colliding with the centre panel on closing
- Installed on the side panel in hole line 37 or 28
- Plastic, grey

<table>
<thead>
<tr>
<th>Order no.</th>
<th>PU</th>
</tr>
</thead>
<tbody>
<tr>
<td>9 236 460</td>
<td>500 ea.</td>
</tr>
</tbody>
</table>

#### Profile support

- Supports the runner profile at the end of the profile
- Use is recommended if the last screw on position cannot be used in the profile for design reasons
- Plastic, grey

<table>
<thead>
<tr>
<th>Order no.</th>
<th>PU</th>
</tr>
</thead>
<tbody>
<tr>
<td>9 236 461</td>
<td>500 ea.</td>
</tr>
</tbody>
</table>

#### Profile mounting clip

- Securely holds the profiles in the correct screw mounting position
- Installation clip can be used on the runner profile and guide profile (on and under the plinth)
- Plastic, grey

<table>
<thead>
<tr>
<th>Order no.</th>
<th>PU</th>
</tr>
</thead>
<tbody>
<tr>
<td>9 237 758</td>

Folding door system

- WingLine L / attached to the side
- System components

**Push to move**

- Mechanism for automatic, soft opening of a door set by pressing on the handleless front
- Set contains all the parts required for opening a folding sliding door with 2 wings

Set comprises:
- 1 Push to move unit
- 1 support unit with 1 Push to open Pin and 1 magnet
- 1 magnetic counterplate
- 1 activator
- 1 door rail
- 1 positioning aid
- Fixing screws

Advice:
- Please order profiles and fittings separately
- Carcase hinges without self closing feature must be used in combination with Push to move. Recommendation: Sensys 8675, opening angle 110°

Our corporate principles include taking responsibility for preserving the natural basis of life. This is where we regard statutory provisions as minimum requirements. Over and above meeting statutory requirements, it is imperative for all members of staff to act in a way that conserves energy and resources in their own particular work environment in order to overcome the global ecological challenges of the near future. In the same way, using energy and resources efficiently also plays a key part in maintaining our competitive edge.

The group wide Environmental Department was established back in 1992, with its sustainability principles of environmental protection and occupational health and safety having consistently set the framework for leading the company group forward in this direction since 1993. Introduced in 1996, the environmental management systems complying with the European EMAS Regulation (Eco Management and Audit Scheme), including ISO 14.001, are of central importance in this context. These implemented a targeted approach to identifying and realising the potentials for using energy and resources in an efficient manner as well as to ensuring conformity with the law. The results are nothing short of impressive.

**Environmentally friendly projects**

Innovative projects are the mark of our approach to environmental management. For instance, the primary-energy requirement of our new production facilities is up to 75% below the specifications demanded in building legislation. The exemplary, consistent use of wood-based materials in constructing our commercial buildings puts us on the forefront of using resource-conserving, renewable building materials that take enormous quantities of climate-damaging CO₂ out of the atmosphere while they are growing.

Since 2015, we have been trying out three new vehicles, each employing different propulsion systems, to test the practical suitability of electric mobility in a variety of usage situations. At our Indian production plant, heavy metals are absorbed from concentrated waste water using an innovative method that involves living algae. At our factory in China, a solar-powered system provides staff accommodation and the canteen with hot water.

**Success stories**

Between 1997 and 2015, for example, we have managed to reduce environmental pollution from manufacturing our drawer runners and drawer systems at the Kirchlengern-Bünde production facility as follows:

- Specific water consumption 45%
- Specific power consumption 10%
- Specific heat consumption 73%
- Specific CO₂ emission 30%

Numerous awards reflect our commitment to the environment. In 2009, the European Commission gave our zero-energy Hettich Forum building the Green Building Award at national level. In 2016, we won the sustainability prize from the East Westphalian Business Environment Foundation for an environment education project carried out over 20 years.
