

## **Hettich at Sicam 2025 in Pordenone/Italy:**

### **Turning furniture and spaces into comfort zones**

**Following its widely acclaimed product debuts at interzum the world's leading trade fair, in Cologne, Hettich is once again making a strong statement at Sicam 2025 in Italy as an international trendsetter in the supplier industry: under the "Transforming Spaces – with innovative motion" banner, the fittings specialist will be presenting a whole array of new and enhanced releases, featured in the form of exceptional furniture ideas for transformable home living environments in hall 5, stand A33/B32 from 14 to 17 October.**

Providing a wide range of system solutions that transform furniture and spaces into true comfort zones, Hettich offers its customers and partners from the trades, retail and industry exactly what they need for business success in today's market: innovative fittings systems consistently developed from a user perspective that make bespoke, exclusive solutions easy to achieve.

### **Modular YOU platform:**

#### **slimline drawer side profiles for all segments**

As inventor of the platform principle, enhancing drawer systems is close to Hettich's heart. The extended YOU platform is one of the top innovations at Sicam. With YOU, Hettich has created a drawer platform that combines design flexibility, efficiency and cost effectiveness in one system: versatile, modular and scalable from the mid-range to high-end segment – "One Platform. Unlimited Options". From a volume model right down to an exclusive one-off, slimline drawer side profiles cover all market segments. Because

throughout, the open, cross-system YOU platform uses identical cabinet body drilling patterns and, thanks to modular building blocks, makes it possible to realise all sorts of options in next to no time – using the same construction basis. YOU's major benefit: only in the final stage of slimline cabinet body production do the chosen runner and drawer define the desired segment. This also makes it possible to respond more quickly to trends and customer wishes – with individually tailored visual and technical design elements.

Providing the key to a wealth of design options, Hettich's YOU platform makes differentiation so easy. Each drawer system from the modular pool comes with its own very own character, and the **ExeoTech** drawer system is a completely new addition: this "master of efficiency" from Hettich with 11 mm drawer side profile has been optimised for industrial high volume production and gives outstanding value for money. The **AvanTech YOU** drawer system with 13 mm side profile is the YOU platform's "versatile designer", also enabling easy upgrades into higher price segments. And for those expecting exclusiveness, Hettich is presenting its minimalist **AvoriTech** system as the platform's purist option: coming in at just 8 mm across, and immaculate in every aspect, this drawer's slender side profiles make it the preferred choice for high-end furniture and kitchens. All three drawer systems – ExeoTech, AvanTech YOU, as well as AvoriTech – open and close on either Quadro YOU partial and full extension runners or Actro YOU full extension runners. What's more, incorporating a catch, wooden drawers can also be used on Quadro YOU partial and full extension runners, on Actro YOU, Quadro 5D and Actro 5D runners.

## **Upgrade for AvanTech YOU "Illumination":**

### **Lighting mood on furniture in extra warm white too**

Within the YOU platform, the [AvanTech YOU](#) drawer system comes with the broadest of individualisation options – using either DesignProfiles, Designcapes, Inlay drawer side profiles or the popular "Illumination" design feature: along the lines of "No plug, just play", "Illumination" lets you add emotive lighting statements to cabinetry and furniture in the kitchen, bathroom and living room. The new system generation is now even easier to install. Requiring no magnets, the LED system can be positioned wherever chosen on the drawer. In each case, a practical rechargeable battery pack provides the necessary energy. This obviates the need for any complex electrical connections, making it so easy to retrofit on drawers already installed. A high level of practical convenience is also shown with the USB-C quick battery charging function. A further new addition makes "Illumination" even more attractive: suiting personal tastes and needs, the colour temperature can now be changed between extra warm white at 2,700 K and neutral white at 4,000 K. This means "Illumination" can match the lighting mood to different applications at any time. And: from 2026, the new "Illumination" generation will also be available for wooden drawers.

## **FurnSpin turning swivelling fitting:**

### **giving furniture and rooms the power of transformation**

The unique [FurnSpin](#) turning swivelling fitting from Hettich's SpinLines product family brings an unprecedented dynamic to furniture. And the free [FurnSpin online configurator](#) now makes it easy for you to plan your own furniture ideas: at a glance, this tool

shows whether furniture is suitable for FurnSpin, automatically checks for potential collisions and finishes the job by providing all hole positions and dimensions in PDF format. Hettich offers FurnSpin in S, M and XL options to suit different furniture sizes and weight classes. The cable management system for hiding the way in which power is supplied is that latest innovation in the range of FurnSpin accessories. Hettich's LED "Illumination" design feature can also be used to create a unique lighting atmosphere in the FurnSpin furniture. – Time and again, "The Joy of FurnSpin" speaks to your customers' emotions, leaving a lasting impression on your clientele.

### **Avosys glass and mirror door hinge:**

#### **Slimline elegance for kitchen, bathroom and living space**

The higher the perceived quality of a glass or mirror cabinet, the more restrained the door hinges need to be. The new Avosys remains visually unobtrusive on the furniture and requires so little space that the cabinet contents now have more room. Avosys can be securely bonded or screwed onto glass and mirror doors. It is also suitable for screw mounting without cup drill hole on thin, hard materials such as Corian® and HPL. Avosys also makes it easy to produce glass and mirror doors in thicknesses of 3 to 8 mm as well as custom material doors in thicknesses of 10 to 12 mm. This new Hettich release will be launched at the end of 2025.

### **Interior fittings from Hettich:**

#### **Storage space organised the smart way**

The Hettich Group has been producing the new "[Interior fittings](#)" range since 2025. Whether in tall units, base units or corner units – Hettich's well-considered, high-quality fitting systems can be

used to optimize and enhance the storage space behind the furniture front with innovative functions. This, for instance, means more convenience for all kitchen users: the interior fitting quickly shows where everything's kept and provides convenient, ergonomic access to cabinet contents. Now, the solutions from Hettich also enable small alcoves, narrow cabinets and hard-to-reach corners to be used more efficiently.

### **SAH 500 - heavy duty cabinet suspension bracket:**

#### **Making heavy wall-mounted furniture appear to float**

The newly developed heavy duty SAH 500 cabinet suspension bracket from Hettich is the preferred choice for "weighty" wall mounted furniture in kitchens, bathrooms and living spaces, such as wall and base units, sideboards and chests of drawers. This clever construction system of wall element and cabinet body element is the only one of its kind on the market and permits a high level of automation. The wall element contains all working parts. It is a component part of the order and bypasses production. Tested to the EN 15939 standard for hardware furniture, the easily mounted SAH 500 can achieve load capacities of up to 110 kg per cabinet suspension bracket. And drawers simply slide past the slender system without collisions, even in confined installation spaces in the cabinet body.

### **"roominspirations":**

#### **discovering creative concepts the digital way**

Hettich also lives up to its reputation as an inspiration driver and partner to the furniture industry by providing this practical service: even during the show, trade visitors and customers can explore numerous ideas for furnishing kitchens, bathrooms, living rooms,

#### About Hettich

Founded in 1888, Hettich is one of today's largest and most successful manufacturers of furniture fittings on the international stage. The family-owned company is based at Kirchlegern in the furniture making cluster of Germany's East Westphalia region. Some 8,400 members of staff work together to provide our future proof solutions in over 100 countries. Promising "It's all in Hettich", the Hettich brand provides a comprehensive portfolio of services that is consistently and resolutely geared to the needs of customers across the globe. By tradition, top priority has always been at the focus of everything we do to ensure sustainability at social, societal and ecological levels. [www.hettich.com](http://www.hettich.com)
