becoming increasingly blurred. The flagship of this transformation is the cutting-edge innovation, FurnSpin from Hettich. The multi-award-winning Turning and swivelling system FurnSpin makes furniture design versatile and creates storage space in a way never seen before. Manufacturers such as Beeck, Burgbad, Eggersmann, Nobilia, Rotpunkt and SieMatic have already high-quality solutions incorporating the Turning and swivelling system FurnSpin into their included in the What's new programme. Rotpunkt becomes FurnSpin present, for example, in a high-bay warehouse application. The system's range of applications extends from rotatable top mounted cabinets and elegant glass display cabinets with lighting right through to floor-to-ceiling units. FurnSpin also shows what the what makes Hettich's innovative fitting technology stand out: dynamism, Comfort and ease of use. The technology remains almost Invisible – the systems blend in perfectly with the materials and furniture design. This forms an important part of the The appeal of the solutions.

A new push for folding door solutions

With WingLine L, Hettich offers a folding door system that also with a dynamic sequence of movements – the Panorama-Impact – inspiring. Ballerina Kitchens presents a collection on the theme of "Storage planning for an organised kitchen routine" a space-saving top mounted cabinet with WingLine L and a new comfort unit. A gentle push on the kitchen front is all it takes, and the cabinet opens automatically and then closes Silent System. The benefits: effortless opening and quick access the contents of the cupboard. WingLine L is available from Häcker, Nobilia and
